

IT MANAGEMENT CONSULTING

Effective IT management promotes innovation and accelerates the realization of strategies, goals and objectives. Our accomplished IT Management Consulting team leverages extensive industry experience (in Public Sector, Financial Services, Health & Human Services, and IT), frameworks, standards, best-practice guidelines, methodologies and best-in-class technologies to deliver tailored services and solutions that address your organization's specific needs.

ENTERPRISE ARCHITECTURE & IT STRATEGY

Based on industry-leading Enterprise Architecture Frameworks, QED National's EA services help define IT strategies that address customer goals and objectives. Through structured definition and management of business, data, applications, technology, and security architectures, we assist customers with these critical areas, which enable them to maximize ROI and optimize results of IT transformation initiatives.

DATA CENTER STRATEGY & PLANNING

Delivery of agile, resilient data center and cloud services are critical to today's business operations. QED National supports our customers by providing services for Data Center assessment, strategy, design, engineering, planning, documentation, project management, as well as technology infrastructure product selection and implementation.

SYSTEMS ENGINEERING & DEVELOPMENT

Leveraging deep industry and technology experience, QED provides superior systems engineering and development services. Led by executives with multiple decades of experience building mission-critical systems, the QED National team prides itself on delivering cost-effective systems that efficiently address customer needs throughout the entire product life-cycle.

PROJECT & PROGRAM MANAGEMENT

Solid Project Management is essential to bringing complex processes together to deliver systems that enable companies to reach strategic business goals. QED National provides some of the most talented and effective project managers in Information Technology, ensuring full project scope is delivered on time and on budget.

GOVERNANCE, RISK AND COMPLIANCE

Applying extensive knowledge and expertise, QED National's Governance, Risk and Compliance consulting provides efficient solutions for the management of policies, assessment and response to enterprise risks (e.g. operational, cyber risk), and compliance with regulations, policies and standards.
